

HEBER VALLEY COMMUNITY GARDENS

Sponsorship

Heber City has sponsored a community garden for more than 12 years. It has been mildly successful, but there is a growing interest in improving the gardens and making them a true community center where people will come together, with a common interest in gardening, to cultivate, grow and harvest vegetables and flowers in predetermined plots.

Currently the garden space is an open, plowed pasture space that has been well maintained by the Heber City Parks Department. Water connections are provided. Every spring volunteers gather in the garden to lay out plots and identify individual spaces. A more defined garden space with raised beds, a drip water system to conserve water and promote growth and identified pathways is the ultimate goal.

In order to make significant improvements to the community garden, our volunteer organization has put together a sponsorship program and asks that as an involved business and citizen in our community, you join our efforts and become a sponsor. WE NEED YOUR HELP!! Your donation will add to the success of the Heber Valley Community Garden and promote healthy lifestyles, fresh, locally grown produce, sustainability and friendships along the way.

Below you will find our wish list for the Community Gardens with estimated costs of services. You can donate goods, in-kind services or money to go towards purchase of product. We hope that you will join our efforts and make the dream of a vibrant and bountiful Community Garden come true.

COMMUNITY GARDEN WISH LIST
